

Build a Secure Cyberspace 2013 Protecting from Targeted Attacks

Hong Kong Computer Emergency Response Team Coordination Centre (HKCERT), the Office of the Government Chief Information Officer (OGCIO) and Hong Kong Police Force (HKPF) jointly organize the seminar. Businesses and individuals face increasing hacking activities that are well organised to disrupt services and steal sensitive information. For Internet facing websites or services, hackers always attack their targets by taking advantages of the software vulnerabilities and security bugs or flaws in application development. In the seminar, security experts will brief the security best practices as well as share their experience on how to protect the information systems and assets from security attacks. You are cordially invited to participate in the event. The details of the seminar are as follows:
